Jasser Houimli

+216 23 628 074 | Manouba, Tunisia | houimlijasser9@gmail.com | linkedin.com/in/jasserho1 | jasserhouimli.github.io/me | github.com/jasserhouimli

Summary

Data engineering and backend-focused computer science student. Builds reliable Spark/Hadoop pipelines and .NET services with strong testing and CI habits. Seeking a 2026 internship in data or backend engineering.

Education

Institut Supérieur des Arts Multimédia de la Manouba (ISAMM) Manouba, Tunisia
Bachelor's Degree in Computer Science *2024 – 2027*
Relevant Coursework: Big Data, Machine Learning, Databases, Data Structures & Algorithms, Operating Systems, Computer Networks

Projects

Reflow – Visual Data Pipeline Orchestration | github.com/jasserhouimli/Reflow

- Built a visual ETL platform with a .NET 10 API and React 19/TypeScript/React Flow editor supporting 10 node types.
- Engineered a DAG execution engine with dependency-aware scheduling, bounded retries, cancellation, and crash recovery for in-flight tasks.
- Added idempotent webhook and cron triggers to prevent duplicate runs, backed by 100+ tests and a GitHub Actions CI pipeline.

Salary Analytics – Hadoop & Spark Pipeline | github.com/jasserhouimli/SalarySwarm

- Built a PySpark ETL pipeline that processed 250,000+ salary records on a 12-container Hadoop and Spark cluster using Docker Compose.
- Built an interactive Streamlit dashboard for salary-trend analysis.

AI Learning – ML Classification & Clustering | github.com/jasserhouimli/ailearning

- Benchmarked KNN, SVM, and Random Forest for high-sales prediction on the Carseats dataset, reaching 88% accuracy with a linear-kernel SVM.
- Used confusion matrices and feature importance to identify price as the strongest predictor.

SketchTogether – Real-Time Collaborative Whiteboard | github.com/jasserhouimli/sketch-together

- Built a collaborative whiteboard with .NET 10 Minimal APIs and SignalR, with shared drawing and sticky notes via link sharing.
- Persisted boards with EF Core and SQLite and added live presence, save status, and shared undo/redo.

ModeforcesAPI – Codeforces-like Backend | github.com/jasserhouimli/modeforcesAPI

- Designed a JWT-secured REST API with 11 endpoints for problems, submissions, and accounts.
- Modeled PostgreSQL with EF Core, documented APIs with Swagger, and built a C/C++/Java/Python judge.

Experience & Activities

Competitive Programming Ongoing
Independent *codeforces.com/profile/JasserCC*

- Solved 200+ algorithm and data-structure problems on Codeforces, AtCoder, and LeetCode.
- Achieved **Pupil** rating on Codeforces and competed in team-based ICPC contests.

Technical Skills

Data & ML: Apache Spark (PySpark), Hadoop (HDFS, MapReduce), Pandas, NumPy, Scikit-learn, Matplotlib, Plotly, Streamlit
Data Stores: PostgreSQL, MySQL, SQL Server, SQLite
Languages: Python, C#, C++, TypeScript, SQL
Backend: ASP.NET Core, Minimal APIs, Entity Framework Core, SignalR, REST, JWT
Frontend: React 19, React Flow, Vite, Tailwind CSS
Infra & Tools: Docker, Docker Compose, GitHub Actions (CI), Git, Linux, Jupyter, Postman, xUnit, pytest
